React Native Training - 2025

- Conducted training on mobile application development for Hitam college students

SUMMARY

Frontend Developer specializing in React.js and React Native with experience building responsive, scalable, and user-centric web and mobile applications. Skilled in component-driven development, state management, REST API integration, and performance optimization. Proficient in modern JavaScript, React hooks, and cross-platform development, with a strong focus on clean code, usability, and delivering production-ready solutions.

WORK EXPERIENCE

Frontend Developer (React.js & React Native)

Galactix Solutions Pvt Ltd

Nov 2024 - April 2026

Web (React.js)

- Developed responsive web applications using React.js, Tailwind CSS, and Ant Design.
- Built telehealth platform features including appointment scheduling, consultation workflows.
- Integrated third-party services like Google Maps, Video SDK, Stripe, and PayPal.
- Improved maintainability using modular architecture and reusable UI components.
- Mentored and guided frontend interns on React.js development and UI best practices.

Mobile (React Native)

- Independently developed production-grade cross-platform mobile applications for Android and iOS using React Native.
- Integrated REST APIs, Firebase services, authentication systems, and push notifications into mobile workflows.
- Generated and deployed Android (APK/AAB) and iOS builds, managing Play Store releases, TestFlight distribution, and App Store submission workflows.
- Implemented native device integrations such as biometric authentication, camera, microphone, and permission handling.
- Developed responsive, user-centric mobile UI/UX across devices with scalable state management using Context API.
- Optimized application performance using lazy loading, efficient rendering, and reusable components, reducing load time by 25%.
